Premium products for the oil and gas industry

CERATIZIT is a high-tech engineering group specialised in tooling and hard material technologies.

Tooling the Future

www.ceratizit.com
As we manage the entire process chain, we can always guarantee top quality and smooth collaboration.
Carbide products for the most demanding requirements in oil and gas

If you are using carbide in the oil and gas industry, if you want to improve the performance of your steel components … or if you are in search for the best individual solution for you – then Hard Material Solutions by CERATIZIT offers you optimal standard or tailor-made carbide blanks, as well as finished products for the most demanding requirements in terms of geometry and grades.

Created by a pioneer with over 95 years of experience in carbide manufacturing, and systematically developed by a technology leader who manages the entire process chain of cemented carbide production, from the raw material to the premium blanks or finished products – CERATIZIT’s unique hard material quality is appreciated by customers, resulting in more efficient processes while increasing productivity and added value.

Premium carbide solutions

Your wish is our guideline: let us know your requirements, and CERATIZIT will deliver – always under the premise of strict confidentiality! At company headquarters in Mamer, Luxembourg, as well as in our subsidiaries and at our joint-venture CB CERATIZIT, based in Asia, our dedicated expert team for oil and gas applications will support you in developing your solution.

CERATIZIT covers the most demanding carbide geometries, with diameters up to 610 mm and heights up to 500 mm. We also develop corrosion-resistant grades specifically for use with oil and gas applications. Internationally renowned brands benefit from our customer-specific and standard solutions.
Advantages & benefits

The all-round package with no worries: from the blank to the high added value finished assembly, we have been your premium partner for more than 95 years.

<table>
<thead>
<tr>
<th>Advantages</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Highly qualified employees, numerous manufacturing possibilities, up-to-date manufacturing facilities (sinter furnaces, presses, CNC machines)</td>
<td>Customised production of the most complex geometries and large dimensions; our production line allows for diameters up to 610 mm and heights up to 500 mm</td>
</tr>
<tr>
<td>Flexible production planning with efficient data interchange</td>
<td>Short delivery times – no matter how demanding</td>
</tr>
<tr>
<td>Thanks to CERATIZIT you can manage the entire process chain, from the raw material to the finished product</td>
<td>Excellent product quality precisely adapted to your needs, maximum process reliability and holistic expertise</td>
</tr>
<tr>
<td>Carbide grades with an optimal ratio of hardness and fracture toughness</td>
<td>Minimal wear and long service life and reduced costs mean higher productivity</td>
</tr>
<tr>
<td>Broad selection, also for proven corrosion-resistant carbide grades</td>
<td>Always the right individual solution for every application</td>
</tr>
<tr>
<td>Technical advice on site: our people have the technical knowledge to support you</td>
<td>Support for every challenge and innovation, rapid response when needed</td>
</tr>
<tr>
<td>More than 70 company locations worldwide</td>
<td>There is always a contact person nearby.</td>
</tr>
<tr>
<td>Global footprint, with worldwide production sites, including Asia with our joint venture CB CERATIZIT</td>
<td>Optimal and flexible offer according to your needs</td>
</tr>
<tr>
<td>Certified product and process quality to DIN EN ISO 9001:2000 and ISO 14001</td>
<td>Optimal reliability for your production</td>

Certification

As a specialist in hard material technology, CERATIZIT is the development partner of experts in the field of high-tech components, offering products and services that stand out on an international scale of comparison.

As one of the leading carbide producers worldwide, CERATIZIT is able to fulfil most of the standards required for the oil and gas industry upon request (e.g. ASTM E165 for Liquid Penetrant Examination).

Our ISO 9001 certification confirms that we comply with the strict technical specifications you require from suppliers.

Product examples for the drilling industry at a glance

**Choke valves**
Available in corrosion & erosion resistant grades for the most demanding applications.

**Highly engineered products for drilling control**

Your partner to find the most suitable solution

At CERATIZIT, we aim to treat our customers as privileged partners and guide them in developing new products or improving existing ones. Thanks to our engineering expertise and project management capacities, we can design innovative carbide solutions to meet the specific requirements of your product.

CERATIZIT’s supreme experience of working with carbide, production experts on the ground and our dedicated engineering team are the guarantee of your future success!
Mud nozzles for drill heads

Thread available as sintered or ground, special forms available upon request

Stabiliser inserts – wear protection for downhole tools

Various design features and grades are available. Coating can be offered to facilitate brazing operations.
Product examples for flow control upstream at a glance

Please note: Hard Materials Solutions by CERATIZIT offers you tailor made carbide components for valves up to a diameter of 610 mm and a length of 500 mm.

We can provide you with the most extreme carbide geometries to fulfil high tech valve requirements, in extremely durable carbide grades.

Please note: disc stacks (silencer trims) are available upon request.
CERATIZIT provides various material combinations, e.g. stainless steel, alloyed steel or Inconel with carbide. Our engineering team is happy to support you in planning your solutions.
Hard Material Solutions by CERATIZIT
wear protection for all applications and industries

- Individual carbide solutions for your application
- Tools for metal forming
- High-performance components for tool construction

Extract from our product portfolio
The CERATIZIT Group

For over 95 years, CERATIZIT has been a pioneer developing exceptional hard material products for cutting tools and wear protection.

The privately owned company, based in Mamer, Luxembourg, develops and manufactures highly specialised carbide cutting tools, inserts and rods made of hard materials as well as wear parts.

The CERATIZIT Group is the global market leader in several wear part application areas, and successfully develops new types of cemented carbide, cermet and ceramic grades which are used for instance in the wood, metal and stone working industries.
