CERATIZIT
THE HIDDEN CHAMPION IN THE UNITED STATES

CERATIZIT is a high-tech engineering group specialized in tooling and hard material technologies.

Tooling the Future
www.ceratizit.com
CERATIZIT USA develops and manufactures highly specialized carbide cutting tools. We control the entire manufacturing process from the raw material to the ready to use cutting tool—all in the USA.

CERATIZIT, formerly known as CERAMETAL, launched production in the USA in 1979. In 2014, CERATIZIT USA acquired Promax Tools now known as CERATIZIT Sacramento. In 2017, CERATIZIT acquired Best Carbide in California and KOMET of America in Illinois. Both companies are now known as CERATIZIT Los Angeles and CERATIZIT Chicago.

The CERATIZIT Chicago facility offers custom engineered solutions and manufactures high precision tools for drilling, boring, reaming, milling and numerous other metal removal tools. Together as a team, CERATIZIT works tirelessly to continuously develop new tooling solutions.

CERATIZIT’s mission is to provide its customers with high-quality cutting solutions. We are actively developing new materials and applying them with our customers to create machines, tools, applications, and consumer goods which shape the immediate environment and are part of everyday life. CERATIZIT’s slogan synthesizes this: Tooling the Future.
A GLOBAL PLAYER

CERATIZIT has over 450 employees across 4 production sites in the United States. In 2017 CERATIZIT had more than $110 million in turnover.

Globally, CERATIZIT has over 9,000 employees working at 34 production sites and over 70 sales subsidiaries across the globe with a turnover of more than $1 billion euros. *2017
CERATIZIT is continually expanding its portfolio. It is currently the fifth largest carbide producer in the world. In 2017, it gained important market shares around the world and made the leap into the Top 5 international cutting tools market.
Extensive PRODUCT PORTFOLIO

Cutting Solutions by CERATIZIT is an innovator in the development and manufacturing of cutting tool solutions covering indexable insert and solid carbide tooling. Customers include OEMs in the aluminum wheel, disk brake, power generation and rail industries, as well as their supply chains. With over 600 patents and more than 100 employees in research and development alone Cutting Solutions by CERATIZIT is a true innovator when it comes to cutting tools.

KOMET is a technology leader in the area of high-precision drilling, reaming, threading and mechatronic tools. Like other group brands, it has thrived through continuous development and quality, which has placed it at the forefront of creating solutions that are tailored for individual customer requirements. KOMET’s premium cutting tool products are applicable across a wide range of industries from automotive to the general machining industry.
KLENK is focused primarily on the aerospace sector, where it leads the way in rotary cutting tools for drilling, milling, reaming and countersinking applications. Many of its products are custom-designed for individual customers around the world, where it applies decades of specific knowledge to machining materials such as carbon fiber, titanium, aluminium and steel.

WNT is a popular brand in Europe known for high quality and innovative tools. We look forward to bringing their name to the US market with a high quality range of solid carbide end mills and drills, as well as rotary toolholding solutions and other productivity boosting solutions.

KLENK is focused primarily on the aerospace sector, where it leads the way in rotary cutting tools for drilling, milling, reaming and countersinking applications. Many of its products are custom-designed for individual customers around the world, where it applies decades of specific knowledge to machining materials such as carbon fiber, titanium, aluminium and steel.
Why Choose CERATIZIT

CERATIZIT is recognized as a premium brand offering a full range of cutting tools.

We are a “best in class” innovator and the fastest growing supplier of cutting tools within our focus segments.

We are fully committed to deliver the highest customer value and continually strive for outstanding performance and results.

CERATIZIT USA works diligently to meet business partner’s expectations. As a leader in materials technology, CERATIZIT continuously invests in research and development and holds over 1,000 patents. As a business partner you can draw on CERATIZIT’s expertise as a leading supplier of cutting tools and carbide solutions. A line-up of benefits include:

▲ Highly skilled specialists in a variety of fields
▲ Monitoring and controlling every step of the production process is our way of life
▲ Our modern production facilities are continuously being updated
▲ Our optimized production processes reduce costs and ensure high quality while being mindful of the environment
▲ Technical support
▲ Technical training
▲ The majority of our standard products are available from stock.
▲ Real time product availability check
▲ Up-to-date technical information and graphic illustrations
▲ Featured products ship the same day if ordered by 5 p.m. EST
▲ We work only with the most reliable service providers in the sector
